Nordic Steel Construction Conference June 26-28, 2024, Luleå, Sweden

[HERE](#) you can download the *Call for paper folder* as a pdf.

It is easy to travel to Luleå!

FLY:

With frequent flights - approximately 15 direct flights daily - and a well-connected airport in Stockholm/Arlanda, travellers can easily hop on a plane and reach Luleå in just a few hours. SAS, Norwegian and Ryanair operate on the route. The flight time between Stockholm-Luleå is just over one hour.

TRAIN:

The train is also an option offering a relaxing way to take in the picturesque landscapes, from lush forests to pristine lakes, as you make your way northward.

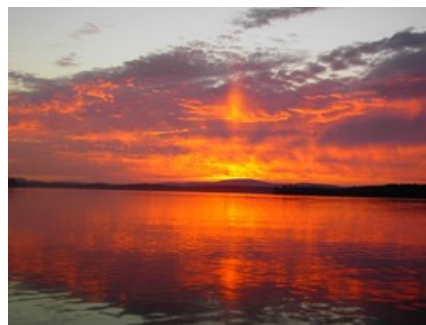

Midnight Sun

All participants will be given the opportunity to experience the Luleå Archipelago on Wednesday 26 June during the **free-of charge, get-together tour**. During this tour we will travel by boat in the beautiful Archipelago, socialise and have something to eat.

When in Luleå, why not take the opportunity to travel further north and witness the stunning phenomenon of the midnight sun?

Fossil-free steel

A study tour will be organized to the **HYBRIT** (Hydrogen Breakthrough Ironmaking Technology) pilot plant. The project that aims to produce the world's first fossil-free steel in commercial scale from 2026. During the tour you will be given a unique chance to see the future in steelmaking.

Fossil-free steel has the same characteristics as traditional steel. It has

the same strength but largely no CO2 emissions. As a user of the steel, you won't notice any difference, but the planet will.

Objectives of the conference

The Nordic Steel Construction Conference has a proud tradition spanning over 50 years. The conference series began in Stockholm in 1970 and has since rotated between the four Nordic countries every three to four years, bringing together academics and practitioners. Sweden will host the 15th Nordic Steel Construction Conference in Luleå in 2024.

The conference aims to present the latest research and results related to the use of steel and composite steel in structural applications, with the overall objective of promoting and enabling a more sustainable and cost-effective construction sector. The conference will bring together academics and practitioners to share their knowledge and insights.

In addition, the conference aims to facilitate new personal contacts and collaborative programs in research and development to promote further innovation in the field.
